MISCELLANEOUS BIDDING PROCESS INFORMATION

The Purchasing Department is responsible for the Bid opening at the time and place noted in the request. If a Vendor is interested in a copy of the Bid tabulation they must include a direct email address, not website, in order to receive results. Obviously sealed Bids cannot be emailed so they must either be delivered by hand, courier, or USPS. (Please note USPS concerns on page #3, item #3.)

A formal invitation for Bid is utilized when the total purchase exceeds \$4,500. The County also uses this method when the life of a term and supply contract is valued more than \$4,500. The Bid Package will contain well-defined standard technical specifications for the nature of the service or product requested. A formal closing date and time is specified. The Bidder must comply with this requirement in order to be considered for award. All Formal Invitations for Bid are handled by the Taney County Purchasing Department. Technical specifications are the responsibility of the specific requesting department.

6. **No fax or electronic transmitted Bids will be accepted.**

2. SCOPE OF SERVICES:

2.1 Overview

Taney County, Missouri is seeking qualified providers of Electronic Poll Books (EPB). In compliance with the Help America Vote Act (HAVA), Missouri has fully implemented a single centralized voter registration database MCVR. Taney County interacts with this database through the use of PC workstations in County locations.

MCVR will be the source of all voter and election structure information necessary to build the database for EPB's. MCVR must be updatable with the voting history created at the polling places using EPB's. EPB's must allow additional information regarding polling places and poll workers to be imported from delimited files such as can be produced in EXCEL.

Taney County anticipates the need for approximately ten (10) to twenty-five (25) units, with an option to purchase more units within the next thirty six (36) months. This is not a commitment to purchase this volume and the number could likely be higher or lower depending on received bids and unit costs. Taney County will not be required to purchase a minimum nor maximum number of units.

2.2 Requirements and Baseline features

Taney County is interested in what the market has to offer and will look for the best combination of features, functions and cost in making a bid award.

- Can the EPB generate interim reports without suspending registration operations?
- Can data be recovered quickly from an EPB that has fully failed during operations? Describe all mechanisms that accomplish this.
- If the voter is considered having voted but we know that they have not, can we override the system to allow a vote to take place? How is this accomplished? How is this limited to authorized personnel?
- Is your system capable of supporting Vote Centers by allowing for voter lists from multiple precincts?
- In a situation where multiple EPB's are located in a single voting location, are the individual units synchronizing and if so, how is this accomplished?
- Can EPB's in multiple locations be submitting information to a central source?
- Does the system maintain information on advance ballots requested and returned ballots?

- What information is downloaded to the EPB to support an election?
- What search functions are provided to find a voter, appropriate voting location or ballot within a location with multiple ballots?
- Does the EPB support electronic signature capture?
- Provide estimates on how long it would take to load an EPB with data.
- Does the system have the ability to read the bar code on a voter registration card that contains the Voter ID number?
- Does the system have the ability to read the bar code on a Missouri driver's license or state ID card for check-in?
- Does the system provide any tools for precinct management?
- Following Election Day, can voter history be quickly and accurately uploaded into the County voter registration database? How?
- Will the system have polling place information for voters who appear at the wrong location?
- Does the system time stamp significant activities such as time of voter check-in?
- Are procedural or process controls included that aid the poll worker for each situation they may encounter?
- Can the poll worker view the last record processed on the screen? Explain the process for cancelling a transaction.
- How is data related to voter check-in archived? What is the procedure to access the archived data years later?

This office has received the following question, answered in red below, as supplied by Taney County Clerk – Donna Neeley... (NOTE: Deadline for questions is Thursday November 14, 2013 @ 9:30 AM)

Section 5.1 of the RFB asks for Total Cost to the County on a per unit basis. Since the total cost of the system would include elements of fixed costs such as services and software that would not change with the quantity of poll books purchased, would the customer prefer the total costs per unit represent those items directly tied to the poll book unit with a detailed quote included showing unit price per deliverable?

ANSWER: We would like a bid price for equipment by piece, and then a bid for software fees, any service that would have to be provided also bid separate such as training, support during election preparation etc.

Thank you.
